CONSENT FOR TREATMENT, THE USE AND DISCLOSURE OF PROTECTED HEALTH INFORMATION FOR PURPOSES OF BILLING, TREATMENT AND FILE MAINTENANCE

NAME _____

Purpose of Consent: By signing this form you will consent to our use and disclosure of your protected health information to carry out treatment, payment activities and health care operations.

Notice of Privacy Practices: You have the right to read our Notice of Privacy Practices before you decide whether or not to sign this consent. Our Notice provides a description of our treatment, payment activities and health care operations of the uses and disclosures we may make of you protected health information and of other important matters about your protected health information. A copy of our Notice accompanies this consent. We encourage you to read it carefully and completely before you sign this consent. We reserve the right to change our privacy practices as described in our Notice of Privacy Practices. If we change our privacy practices we will issue a revised Notice of Privacy Practices which will contain the changes. Those changes may apply to any of your protected health information that we maintain.

Right to Revoke: You will have the right to revoke this Consent at any time by giving us written notice of your revocation submitted to our Contact Person. Please understand that revocations of this consent will not affect any action we took in reliance on this consent before we received your revocations and that we may decline to treat you or to continue treating you if you revoke this consent.

Informed Consent: I will use my hands or a mechanical instrument upon your body in such a way as to move your joints. This procedure is referred to as "Spinal Manipulation" or "Spinal Adjustment". As the joints in your spine are moved you may experience a 'pop' call cavitation as part of the process.

There are certain complications that can occur as a result of a spinal manipulation. These complications include, but are not limited to: muscle strain, cervical myelopathy, disc and vertebral injury, fractures, strains and dislocations, Bernard-Horner's Syndrome (also know as Oculosympathetic Palsy), costovertebral strains and separations. Rare complications include, but are not limited to stroke. The most common complication or complaint following a spinal manipulation is an ache or stiffness at the site of adjustment.

I am aware of these complications and in order to minimize their occurrence I will take precautions. These precautions include but are not limited to my taking a detailed clinical history of you and examining you for any defect which could cause a complication. This examination may include the use of x-rays. The use of x-ray equipment may pose a risk if you are pregnant. If you are pregnant, you should tell me when I take your clinical history.

I have had full opportunity to read and consider the contents of this consent form and your Notice of Privacy Practices. I understand that by signing this consent form I am giving my consent to your use and disclosure of my protected health care information to carry out treatment, payment activities and health care operations.
